

Car Hire Receivables-BI:

Visibility Where You Need It

RMI's Car Hire Receivables-Business Intelligence (CHR-BI) allows you to monitor, analyze, and summarize vast amounts of current and historical car hire information with just the click of a mouse. You can...

- Identify gaps in car hire earnings
- Analyze car hire reclaims
- Monitor car hire earning trends proactively.

Digital Dashboards

Digital dashboards continually monitor key car hire trends. The dashboards also highlight potential problem areas such as invalid reclaims or earning declines caused by idle equipment. The summary and detail level reports behind each display allow

you to drill down to the underlying data, identifying the specific causes of negative trends.

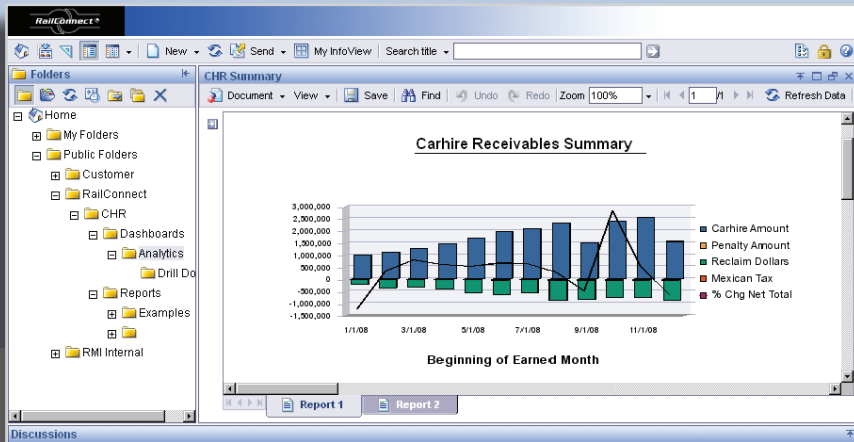

CHR-BI offers six key performance indicator dashboards to track current and historical car hire earnings trends. You can configure these dashboards to provide summarized car hire information by fleet or by railroad to maximize productivity.

The dashboards also highlight additional trends such as abnormal reclaims or out of service equipment to ensure that you are aware of potential trouble spots before serious problems occur.

Intelligent Reports

CHR-BI's wide variety of reporting options gives you unlimited analysis of your company's car hire details. You can answer any question about your car hire earnings with our easy-to-run library of standard reports, charts, and tools. For more specialized queries, an ad-hoc tool within CHR-BI allows even non-technical users to create custom reports and graphs easily.

Call RMI today to start improving your fleet visibility and car hire earnings. (404) 355-6734
