## **RMI Features Intermodal TOS and Shipper Software at 2011 IANA-NITL Conference**

**Atlanta, GA** – RMI, the largest independent provider of Transportation Management Software and comprehensive information services to the rail industry, announced today it will exhibit at the 2011 Intermodal Expo and Transcomp Conference in Atlanta, Ga., on November 13-15. RMI will feature industry-leading rail software products including [OASIS](#), the primary terminal operating software for intermodal rail terminals across North America, and [ShipperConnect](#), a comprehensive software offering for rail shippers to manage, execute, and plan shipments.

RMI's OASIS is a comprehensive terminal operating software that provides precise management and control of all terminal events, including inbound and outbound gate processing, inventory and work flow management, and sophisticated train planning and loading. OASIS successfully interfaces with a broad range of technologies including wireless connectivity, OCR data captures, and equipment sensors to deliver real-time reporting and operations support. RMI will preview state of the art software architecture and new offerings to facilitate enhanced human/machine interaction.

RMI's ShipperConnect offers an integrated suite of software products to help rail shippers manage shipment visibility, rail operations, and inventory planning. RMI will feature [ShipperConnect Transload](#), an innovative terminal management software solution for transload operators to manage, control, and process inventory and transportation equipment.

The [Intermodal Expo and Transcomp Conference](#) is the premier multimodal freight transportation exhibition where companies showcase the latest innovations in information technology and management tools. RMI will exhibit in booth 1010 on November 13 - 15.

### **About RMI**

*RMI is the largest independent provider of Transportation Management Software and comprehensive information services to the railroad industry. Founded in 1979, RMI leverages in-depth knowledge of rail operations, intermodal terminal operating systems, and multi-modal transportation management to provide Software as a Service and licensed solutions to railroads and industrial shippers. RMI's software is used to*

*manage rail and intermodal operations, signal and communication assets, railcar repair billing and inventory, and multi-modal visibility, planning, and execution for industrial shippers and logistics service providers. RMI is a portfolio company of The Carlyle Group. For more information about RMI software and services please visit [www.rmiondemand.com](http://www.rmiondemand.com).*
