

Press Release

RailAmerica Selects RMI's RailConnect Transportation Management System

Atlanta, GA – June 2, 2010 – RMI, the largest independent provider of rail-transportation software solutions to the transportation industry, today announced that RailAmerica, Inc. (NYSE: RA) will implement RMI's RailConnect® Transportation Management System (TMS) at all 40 of its North American railroads.

In addition to RMI's TMS solution, RailAmerica plans to use RMI's mCrew product for remote train-crew reporting, as well as ShipperConnect® to provide better service and support to its customers, improve the operational efficiencies of its railroads, and seamlessly integrate with RA's accounting system.

"Our Horizon Project is focused entirely on improving the customer experience," said RA Vice President Planning Mike Oakley. "The entire business case for this initiative was based on the premise that better service enhances the bottom line, and RMI is a major enabler of achieving that goal."

Pete Kleifgen, RMI Chairman and CEO, said "RailAmerica is a valued partner of RMI and we are extremely pleased to be collaborating with the entire RA team on this ambitious project. We are confident that RailAmerica will achieve and exceed their expectations, and we look forward to continuing our aggressive implementation process across the entire family of RailAmerica railroads."

David Novak, RailAmerica senior vice president and chief administrative officer, said, "We feel confident in RMI's ability to migrate successfully all of our properties to what we believe is the most advanced transportation operating system in the industry for regional, terminal, and short line railroads. RMI brings a level of experience and professionalism to the project that will ensure its success."

About RMI

RMI is a leading independent provider of Transportation Management Software for carriers and shippers. Founded in 1979, RMI is recognized as the most successful Software as a Service (SaaS) provider in the transportation industry with an in-depth knowledge of rail operations, intermodal terminal operating systems, and multi-modal transportation management. RMI's software is used to manage rail and intermodal operations, signal and communications maintenance, and end-to-end multi-modal planning and execution for shippers and 3PLs. RMI is a portfolio company of The Carlyle Group and is based in Atlanta. For more information on RMI visit www.rmiondemand.com.

About RailAmerica

Jacksonville, Fla.-based RailAmerica's portfolio of 40 individual short line and regional freight railroads operate on approximately 7,400 miles of track in 27 states and three Canadian provinces. For more information, visit www.railamerica.com.
