

Press Release

RMI Announces 23rd Annual Conference for the Rail Software Industry

Atlanta, GA – February 16, 2012 – [RMI](#), a GE Transportation company, and leading provider of transportation management software and analytics to the railroad industry, today announced its highly anticipated 2012 User Group and Commercial Conference will be held in Atlanta, Georgia on June 12-13. RMI showcases this annual event to provide customers with training and education and introduce new and innovative software applications to help railroads, rail shippers, and railcar owners manage their operations and improve performance.

RMI Chairman and CEO, Pete Kleifgen said, “Our annual User Group and Commercial Conference continues to be an integral part of our customer’s success. Many of our attendees come year after year because this event provides the opportunity to gain hands on experience with our software products, learn best practices, and benchmark progress against their peers.”

RMI’s User Group and Commercial Conference is attended by employees of companies in every major segment of the rail industry including short line and regional railroads, Class I railroads, railcar leasing companies, rail shippers, and intermodal terminal operators. RMI actively fosters an environment conducive to free exchange of knowledge and ideas that apply to those new to the railroad industry as well as industry veterans. Conference participants attend interactive breakout sessions, receive hands-on training, and take advantage of numerous opportunities for formal and informal networking.

The 2012 User Group and Commercial Conference will be held at the InterContinental Buckhead Atlanta hotel located in Atlanta, Georgia.

About RMI

RMI, a GE Transportation company, is a leading provider of transportation management software and analytics to the railroad industry. Founded in 1979, RMI is part of GE’s (NYSE: GE) \$2.5 billion a year software operations with more than 5,000 software professionals worldwide. RMI solves the world’s toughest transportation challenges. RMI leverages in-depth knowledge of rail operations, intermodal terminal operating systems, and multi-modal transportation management to provide Software as a Service and licensed solutions to railroads and industrial shippers. RMI’s software is used to manage rail and intermodal operations, signal and communication assets, railcar repair billing and inventory, and multi-modal visibility, planning, and execution for industrial shippers and

logistics service providers. For more information about RMI software solutions and analytics please visit www.rmiondemand.com.
