RMI Named a Top 100 Logistics Technology Company

Atlanta, GA – RMI, the largest independent provider of rail software and comprehensive information services to the transportation industry, today announced that for the sixth consecutive year, the company has been named a Top 100 Logistics Technology Company by *Inbound Logistics* magazine.

Every April, *Inbound Logistics* editors recognize 100 logistics IT companies that support and enable logistics excellence. *Inbound Logistics* selects the Top 100 Logistics IT Providers who are leading the way in 2011, and the editors seek to match readers' fast-changing needs to the capabilities of those companies selected. These companies reflect leadership by answering *Inbound Logistics* readers' needs for scalability, simplicity, fast ROI, and ease of implementation.

“Given the dynamism in the logistics technology segment, and the volatile pace of change across the global economy, it's impressive to see RMI providing the kinds of solutions *Inbound Logistics* readers want and need. It's tough to keep up with customer demands in any environment, but the speed with which change is happening is a testament to RMI's ability to keep pace and, in some cases, anticipate customers' ever-evolving requirements. For that reason, *Inbound Logistics* editors have recognized RMI as one of 2011's Top 100 Logistics Technology companies.” Felecia Stratton, Editor, *Inbound Logistics*.

Kirk Knauff, Vice President of Marketing and Services said, “RMI is honored to be recognized once again by *Inbound Logistics* as a top logistics technology provider. For over 30 years, RMI has been dedicated to helping our clients succeed through our deep knowledge of the rail transportation business. We will continue to offer dynamic and unique software solutions that help our customers manage their transportation needs.”

About RMI

RMI is the largest independent provider of comprehensive rail information services to the transportation industry. Founded in 1979, RMI leverages in-depth knowledge of rail operations, intermodal terminal operating systems, and multi-modal transportation management to provide Software and Service and licensed solutions to railroads, ports and terminals, and industrial shippers and logistics service providers. RMI's software is used to manage rail and intermodal operations, signal and communication assets, railcar repair billing and inventory, and end-to-end multi-modal visibility, planning, and execution for industrial shippers and logistics service providers. RMI is a portfolio company of The Carlyle Group. For more information about RMI software and services please visit www.rmiondemand.com.

About Inbound Logistics

Since its inception in 1981, Inbound Logistics' educational mission is to illustrate the benefits of demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift. Inbound Logistics offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, and offset rising transport costs,

supporting business scalability across their value chain. More information about demand-driven logistics practices is available at www.inboundlogistics.com.
