

Calculate. Manage. Report. **Your Time.**

RailDOCS® Hours of Service for Safety & Compliance

RMI's RailDOCS **Hours of Service** electronically records employee work hours and provides real-time access to employee rest status and availability. It complies with the Code of Federal Regulations, Title 49, Part 228, which governs hours of service for railroad employees and mandates undisturbed rest periods, electronic signature and record keeping. **Hours of Service** is a web-based product that can stand alone or easily integrate with the RailDOCS suite of software.

RailDOCS is a web-based and mobile solution that works with all OEM vendors to provide a single, independent source of data and control from the largest asset database of its type in North America. RailDOCS handles more than 250,000 web requests per day, manages over 1 million separate configuration items, and stores over 5 million test and inspection forms.

Hours of Service for Safety and Compliance

RailDOCS **Hours of Service** delivers quick and efficient recording of employee work hours and provides real-time visibility on employee rest status and availability.

Hours of Service electronically records employee work hours and satisfies all reporting requirements for compliance with the Rail Safety Improvement Act, which limits consecutive work hours and mandates undisturbed rest periods to promote a safe work environment.

Because **Hours of Service** meets all regulatory requirements for electronic signature and record keeping, it is an effective tool to help railroads manage “human fatigue” – one of the National Transportation Safety Board’s most critical safety issues.

Hours of Service provides easy-to-use management tools that support access to service records by the FRA and state inspectors. Once record keeping of employee hours is fully electronic, railroads eliminate the need to file excess monthly service reports, which saves time and money and ensures compliance.

Event Type	Service Type	Location	Date	Time	Status
Begin Normal Service	Covered	16 5 27	2010-04-16	08:00	
Change Service Type	Non-Covered		2010-04-16	12:00	
Change Service Type	Covered		2010-04-16	13:00	
End Normal Service	Covered	16 5 27	2010-04-16	18:00	

Hours of Service can stand alone or easily integrate with other RailDOCS products, and it offers railroad employees two ways to report service hours - online or via an interactive voice response system.
